PROJECTS

Portfolio Website
- Showcase of skills and projects with HTML and CSS. Ensured seamless user experience with responsive design principles.

Flight Booking System
- Developed a comprehensive flight booking system using HTML, CSS, JS, and PHP. The system enables users to search, book & view flights and manage bookings.

Snake Game
- Developed a classic snake game using data structures for optimized gameplay.

Restaurant Management System

- Designed a robust DBMS for restaurant operations, focusing on data modeling and query optimization.

Library Management System

- Developed a feature-rich library management system in Java using OOP principles and MS Access database, streamlining library operations.
